Access to the SPA center is complimentary for all hotel guests, while treatments are charged according to the current price list.

SPA Treatment Offer

Relax Massage – A gentle, pleasant, manual massage designed to achieve full body relaxation, muscle relief, and stress reduction. The treatment aims to calm and soothe you, using relaxing, light pressure and specialized relaxation oils.

Aromatherapy Massage – A treatment focused on the use of warm aromatic oils. This gentle and calming full-body massage not only relieves pain but also improves mood. The essential oils we use are designed to penetrate the skin quickly, entering the bloodstream to spread their healing properties throughout the body for a truly beneficial effect.

Therapeutic Massage – A versatile treatment that sits between relaxation and sports massage, serving as a powerful tool against muscle pain, injury, and stiffness. It is a dynamic therapy where the therapist adjusts pressure and focus to suit different muscle groups.

Hogo Lux Candle Massage – A unique Thai-inspired treatment involving the gentle rubbing of melted wax from a specialized candle. The warmth of the scented oil penetrates deep into the pores, deeply hydrating the skin and gently relaxing tense muscles, leaving a long-lasting sense of peace.

Hot Volcanic Stone Massage – A unique treatment using warm volcanic stones to provide thermal therapy to the muscles, helping to reduce tension and pain. The stones slowly release heat that spreads throughout the body, providing a feeling of restfulness and lightness. Based on a predetermined plan and the guest's health condition, the therapist uses various stone massage techniques.

Partial Massage – A combination of different techniques applied only to specific parts of the body. This massage releases muscle tension and improves tissue and joint mobility. Depending on individual needs and wishes, a relaxing or therapeutic technique is chosen. Head, Face, and Neck Massage – Performed using specialized premium quality oils. Gentle movements relax the muscles and stimulate circulation, giving the face a natural glow and a sense of well-being.

Hand and Foot Massage – Combines various techniques such as acupressure, smoothing, and kneading. In addition to the therapeutic aspect, this massage applies pressure to specific acupressure points to stimulate certain organs or signal potential dysfunction.

Thalgo Facial Hydration Treatment – Designed for intensive hydration and restoring radiance. It uses an active serum and mask that deeply renew the skin, making it soft and silky.

Thalgo Combination Skin Treatment – Tailored to the specific needs of combination and oily skin. The focus is on deep purification, regulating sebum secretion and eliminating oily shine while maintaining hydration.

Thalgo Dry Skin Treatment – A soothing and nourishing treatment intended for very dry and sensitive skin. It is designed to restore the skin's protective barrier, increase its tolerance and eliminate feelings of tightness, stinging, and redness.

La Fervance Premium Facial Treatment – Represents the pinnacle of luxury, carrying the prestigious COSMOS certificate, which guarantees the world's highest level of purity and ingredient quality. The products are designed to suit all skin types, especially those in need of glow, tightening and deep hydration.
